

Patient After Care Information

CoolSculpting

What to expect directly after a treatment:

Swelling, tenderness, bruising, numbness, itching, and nerve pain in area that can persist up to 4 weeks.

Wearing a compression garment if required to help support tender areas and reduce swelling.

Take Panadol or Panadine when required.

If bruising develops use Hirudoid topical cream until bruises fade.

Book in your 8-12 week review.

If you have any concerns about your treatment please do not hesitate to contact us at Absolute Cosmetic Medicine on (08) 9389 9099.
