## **FAT DISSOLVER INFORMATION AND CONSENT**

**ONLY SIGN IF YOU FULLY AGREE AND UNDERSTAND**

### **WHAT IS D.A FAT DISSOLVER?**

Fat dissolver is an injectable drug that can reduce submental (under the chin) fat and redefine your jawline, effectively reducing your double chin without surgery. Submental fullness is a common yet undertreated facial aesthetic condition that affects both men and women. This condition can be influenced by several factors including aging, genetics, weight gain, and is often resistant to diet or exercise alone. It can be used on any small fatty roll.

The fat dissolver product consists of a synthetic form of D.A, which is a naturally occurring substance in our bodies. When injected into a targeted area, it destroys fat cell membranes, allowing the fat inside to be released and naturally eliminated from the body.

### **WHAT DOES THE TREATMENT INVOLVE?**

Treatment takes approximately 15-30 minutes and is done with a series of injections on a grid to accurately treat the full area of submental fat. The area must be kept clean and dry and recovery is extremely quick, allowing a return to work almost immediately.

### **ARE THERE ANY SIDE EFFECTS?**

Fat dissolver does come with a few possible side effects, as most cosmetic injectables do. Luckily, they're usually mild, and the possibility of developing severe complications is minimal. The most common side effect is swelling, which can last on average 3 days after your treatment. You may also experience some bruising, itchiness, redness, and general discomfort. Some patients also experience numbness or tenderness in the targeted area, in some cases for up to 2 months.

### **HOW MANY TREATMENTS WILL I NEED AND WHEN WILL I SEE RESULTS?**

The amount of treatments required will vary depending on the individual patient. In some cases, up to 6 treatments may be required, however visible results can be seen in 2-4 treatments. If multiple treatments are required these will need to be spaced 4 weeks apart.

Effects from the Fat dissolver treatment should begin to be noticeable within several weeks, after which your chin, neck and jawline should appear smoother, firmer, and more contoured. Results will develop gradually for the most natural-looking outcome possible.

### **IS FAT DISSOLVER COVERED BY MEDICARE OR PRIVATE HEALTH FUNDS?**

No, it is a cosmetic procedure and unfortunately most cosmetic procedures are not covered.

# FAT DISSOLVER INFORMATION AND CONSENT

ONLY SIGN IF YOU FULLY AGREE AND UNDERSTAND

I CONSENT TO FAT DISSOLVING INJECTIONS AND I ACCEPT THE POSSIBLE SIDE AFFECTS.

	INITIAL
Redness and swelling	_____
Bruising	_____
Infection	_____
Scars	_____
Localized and severe allergic reaction	_____
Pain and persisting pain	_____
Skin and fat necrosis	_____
Cardiac disturbance, severe complication and death	_____
Failure and partial failure of procedure	_____
Other unexpected and further investigation treatments for these	_____
Loose skin	_____
Adjacent structure damage (nerve and vascular supply) including rare alopecia	_____

Having discussed the reasonable expectations of this treatment with me, and having had all of my questions answered to my satisfaction, I authorise and direct Dr. Glenn Murray or the assistants of his choice to perform this procedure. I understand that the practice of medicine is not an exact science and although good results are expected, there can be no guarantee as to the outcome. I release Dr Murray and all associated staff from medico-legal liability.
